

SHOOT REPORT SCORE SHEETS

For faster and easier processing of shoot report scores, each gun club must follow these instructions when filling out their score sheets.

- Participant's name and number must be clearly printed on the top of the score sheet.
- If the participant earns yardage, the original yardage must be left on the score sheet.
- If the score is out of 1,000, divide both targets shot and targets broken by 2, since the A.T.A. is unable to process any targets shot at beyond 3 digits.

Example: 956/1000
Change to: 478/500 478/500
- In the case of handicap events with more than 100 targets, each 100 targets needs to be recorded individually.
- Only the total of the participant's score needs to be turned in, not the sub-event scores. The same is true for league shoot scores.
- If a participant's targets shot at differ from those of the other participants, the total number of targets that were shot at must be noted.
- When score sheets are mailed, they must be securely bound together, preferably with rubber bands or paper clips rather than with staples.

The score sheet at the right shows how this form is correctly filled out and must include: 1. The participant's name and A.T.A. membership number (clearly printed); 2. The date on each
