

ATTENTION 3S USERS!

Please, Please,
Please help to get
your registered scores
in front of shooters
more quickly!

*If you attach the
ATADATA file from 3S
to an email to results@
shootata.com it will
speed up the processing
time at the ATA office
tremendously.*

The 3S process to create a data file with shoot scores is simple and quick. However, there are many clubs that still print the scores on paper and mail them to the ATA office. This is time consuming and more costly to the club and slows down the processing procedure.

This can all be done in 3S with just a few clicks on your computer.

- #1 – Go to “REPORTS”
- #2 – Click on #10 – ATA/PITA Scores
- #3 – Click to File
- #4 – Select Folder Name for Scores. (Find the file where you want to save the scores to. (If saving to jump drive use the dropdown arrow and locate your file.)
- #5 – Click Run. Once file is saved be sure to check that your file was saved correctly. (Open File Explorer, go to your file, Double click ATADATA and open with Notepad.) If file is ok then close.
- #6 – Attach the ATADATA file to an email to results@shootata.com and SEND IT!
